### UK Round 1 - 2013

### MARK SCHEME

Question	1	2	3	4	5	Total
Mark	9	13	9	15	17	63

Although we would encourage students to always quote answers to an appropriate number of significant figures, do not penalise students for significant figure errors. Allow where a student's answers differ slightly from the mark scheme due to the use of rounded/non-rounded data from an earlier part of the question.

For answers with missing or incorrect units, penalise 1 mark for the first occurrence in **each** question. Do not penalise for subsequent occurrences in the same question.

Question 1																		
(a)		$3\text{N}_2\text{H}_4(\text{l}) \rightarrow 4\text{NH}_3(\text{g}) + \text{N}_2(\text{g})$ [Ignore state symbols]	1															
(b)		$\Delta_f H^\ominus = ((2 \times 46.1) + 187.8 - (2 \times 285.8) + \Delta_f H^\ominus (\text{N}_2\text{H}_4)) \text{ kJ mol}^{-1} = -241.0 \text{ kJ mol}^{-1}$ $\Delta_f H^\ominus (\text{N}_2\text{H}_4) = 50.6 \text{ kJ mol}^{-1}$ Decomposition enthalpy = $-50.6 \text{ kJ mol}^{-1}$ [Positive answers of correct magnitude do not score credit.]	1
